*Rating is based on water at a starting temperature of 203°F (95°C) at a room temperature of 68°F (20°C) **64 oz. model only

Pouring Mechanism:

One-Touch Pour

Push Button Stopper

Open Stopper

Twist Stopper

Slide Open

What is Vacuum Insulation?

The air between two layers of glass or stainless steel is removed to create a vacuum. Because there is no air, the temperature on the other side of the wall does not transfer over, keeping beverages hot or cold for hours.

Stainless Steel Thermal Carafes (please see previous page for glass carafes)

Type		Thermal Carafe—Hot or Cold			Creamer—Cold Only

The Story About Zojirushi:

Zojirushi (pronounced ‘zoh-jee-ROO-shee’) began in Japan in 1918 as a manufacturer of hand-blown glass vacuum bottles. Today, Zojirushi’s product line extends to high-end small appliances such as rice cookers, breadmakers and coffee makers, high quality vacuum insulated products like vacuum bottles, lunch jars and carafes, and commercial restaurant and coffee equipment. In the past few years, Zojirushi has enhanced the focus on design and how appliances fit into everyday lives with the introduction of a variety of new products. The name Zojirushi means “Elephant brand” in Japanese.

*Rating is based on water at a starting temperature of 203°F (95°C) at a room temperature of 68°F (20°C) ** Rating is based on water at a starting temperature of 35°F (1.5°C) at a room temperature of 70°F (21°C)

What is the difference between a glass liner and a stainless steel liner?

The main difference is durability and ease of cleaning. If you have breakage problems, the stainless steel liner is recommended. Stainless steel is virtually indestructible except to bleach and chlorine. Glass liners have a higher incidence of breakage, but are easier to clean away coffee and tea stains.

Glass Liner vs. Stainless Steel Liner Comparison

	Pros	Cons
Glass Liner	<ul style="list-style-type: none"> • Excellent heat retention • Easy-to-clean • Does not alter the flavor of coffee 	<ul style="list-style-type: none"> • Glass liner can break, although replaceable
Stainless Steel Liner	<ul style="list-style-type: none"> • Indestructible • Excellent heat retention (preheating recommended) 	<ul style="list-style-type: none"> • May stain • Cannot come in contact with bleach or chlorine
